1000minds

Bespoke software for decision-making

1000minds helps you build decision-making applications and integrations

JACOBS   Environment Agency   Fisher&Paykel HEALTHCARE   Google   New Zealand POLICE

Let's create the perfect solution together

The 1000minds suite meets the vast majority of customers' needs. However, sometimes you need to integrate with existing systems that need a prioritization component, or you want to capture preferences and expert judgments in your existing applications.

How 1000minds can help:

Software advice
We can advise you on how to build the outputs of 1000minds into your existing applications

Hosting
1000minds can deploy and manage systems on your behalf – typically on Microsoft Azure

Development
We can build entire systems, or build modules for integration with your systems

UX design
We can work with you to design decision-making and surveying aspects of your systems

---

Choose 1000minds when you need:

- Good decisions that can be trusted because they are: transparent, consistent, fair, valid and reliable, stress tested

- Peer-reviewed academic credentials using 1000minds' patented PAPRIKA algorithm

- Stakeholder buy-in from consensus-based collaborative decisions

- To get the job done fast – up and running in weeks, not months

- Cost-savings from not having to reinvent the wheel

- Experience from the field so that you can avoid common mistakes and succeed on Day 1

"

The best MCDA engine money can buy. I can't find one thing that I don't like about it.

– Colin S

Focus on what matters

Use 1000minds to get to the heart of your decision-making problems and choose the best options.

Find solutions faster

Get up and running quickly and easily share access with colleagues so you can work together.

Target new possibilities

Make better decisions and spot opportunities sooner by evaluating simple trade-off scenarios.

Take people with you

Engage with others, ranging from experts to members of the public.
